BUSINESS CARD SCANNER

In Business contacts are very important but in today's busy life it is not possible to remember each and every name of every individual you have met earlier. Also we cannot neglect the fact that the contacts can be crucial at hard times of business.

But in a day we came across a lot of business cards and to manage them properly every time is a tough task. When we need to contact that person in emergency time then it is not possible to find it and we have to face losses at that time.

To overcome this, we introduce to our business card scanner. Many would think that what this device does? It scans the information printed on the visiting card or business card and stores onto your PC. Whenever you think business card could be found in a second from many business cards via Searching information from the business card, such as company name, person name, contact details, etc..

All information from business card/ID card will be saved as JPG, EXCEL, outlook format that can be used later.

ADVANTAGES
